Map of Few our Clientele

NUKSHI construction was established in 1996. NUKSHI construction is a certified company, and a name of trust in the construction of high quality commercial and residential projects.

Professional calibration for maximum precision Construction sites are harsh environments and put incredible strain on lasers. In the majority of construction projects, lasers face so many impacts that their accuracy can no longer be guaranteed. This can cause inaccuracy and thus, application mistakes may occur. To ensure accurate and consistent performance, laser owners should carry out periodic calibration and maintenance of their equipment.

Reliable calibration – reliable performance

- Have all your rotating, grade, pipe, line and point lasers professionally checked, calibrated and certified at your local Leica Geosystems distribution partner

- Avoid costly mistakes by having your lasers periodically checked and calibrated

- Work with peace of mind knowing that your lasers are calibrated to the highest accuracy standards
